

INTRODUCING THE PATT FOREST ACADEMY

WHY ESTABLISH A FOREST ACADEMY?

With the government setting the target of planting 30000 Ha of new woodland by 2025 many organisations are gearing up their tree planting targets.

Many third sector organisations such as PATT are responding to this challenge by using volunteers to carry out the tree planting.

Volunteer planted tree survival rates at five years are often, only a fraction of those achieved by professional planters.

LEVEL 1 INTRODUCTION TO TREE PLANTING

Designed to provide a basic level of training to volunteers

Designed to provide critical point analysis for supervisors

Designed to increase tree survival rates!

LEVEL 1 TRAINING COVERS

- The benefits of community tree planting
- Handling trees correctly
- Staying safe
- Professional planting tips
- Guarding your tree
- Scouting
- Maintaining your tree
- Recoding success

DELIVERY

The course is delivered over Zoom by a specialist tutor who has considerable hands-on experience of community tree planting.

The course is one hour in duration. All participants receive a certificate of attendance.

COST

The cost of the training is £15 + £1.76 booking fee.

Resellers can book participants onto courses for £10 + £1.76 booking fee.
